

LONDON FINE SOAPS

# BASED IN LONDON

We are proud to be based in London, a city steeped in history and tradition but driven by the international mix of culture, talent and ideas that make us so unique. Our home in the UK's capital inspires us and challenges us to strive for perfection. We bring the finest ingredients from around the world to create our luxury soaps and moisturisers.

# FOCUSED ON THE WORLD

London Fine Soaps has a singular focus: to reduce the number of small plastic amenity bottles and partly used bars of soap being sent to landfills worldwide.

We provide the finest dispenser systems and couple them with our luxury soaps, shampoos and moisturisers that are all available in large capacity packs. This holistic approach helps hotels, spas, leisure centres and other businesses cut down on daily waste without compromising on quality.

Better for our planet, better for your business.

# DISPENSERS

London Fine Soaps dispensers are the ideal complement to our soaps, moisturisers and haircare products. Available in Chrome or Satin Silver, our dispensers provide attractive, functional and durable alternatives to single-use plastic bottles.

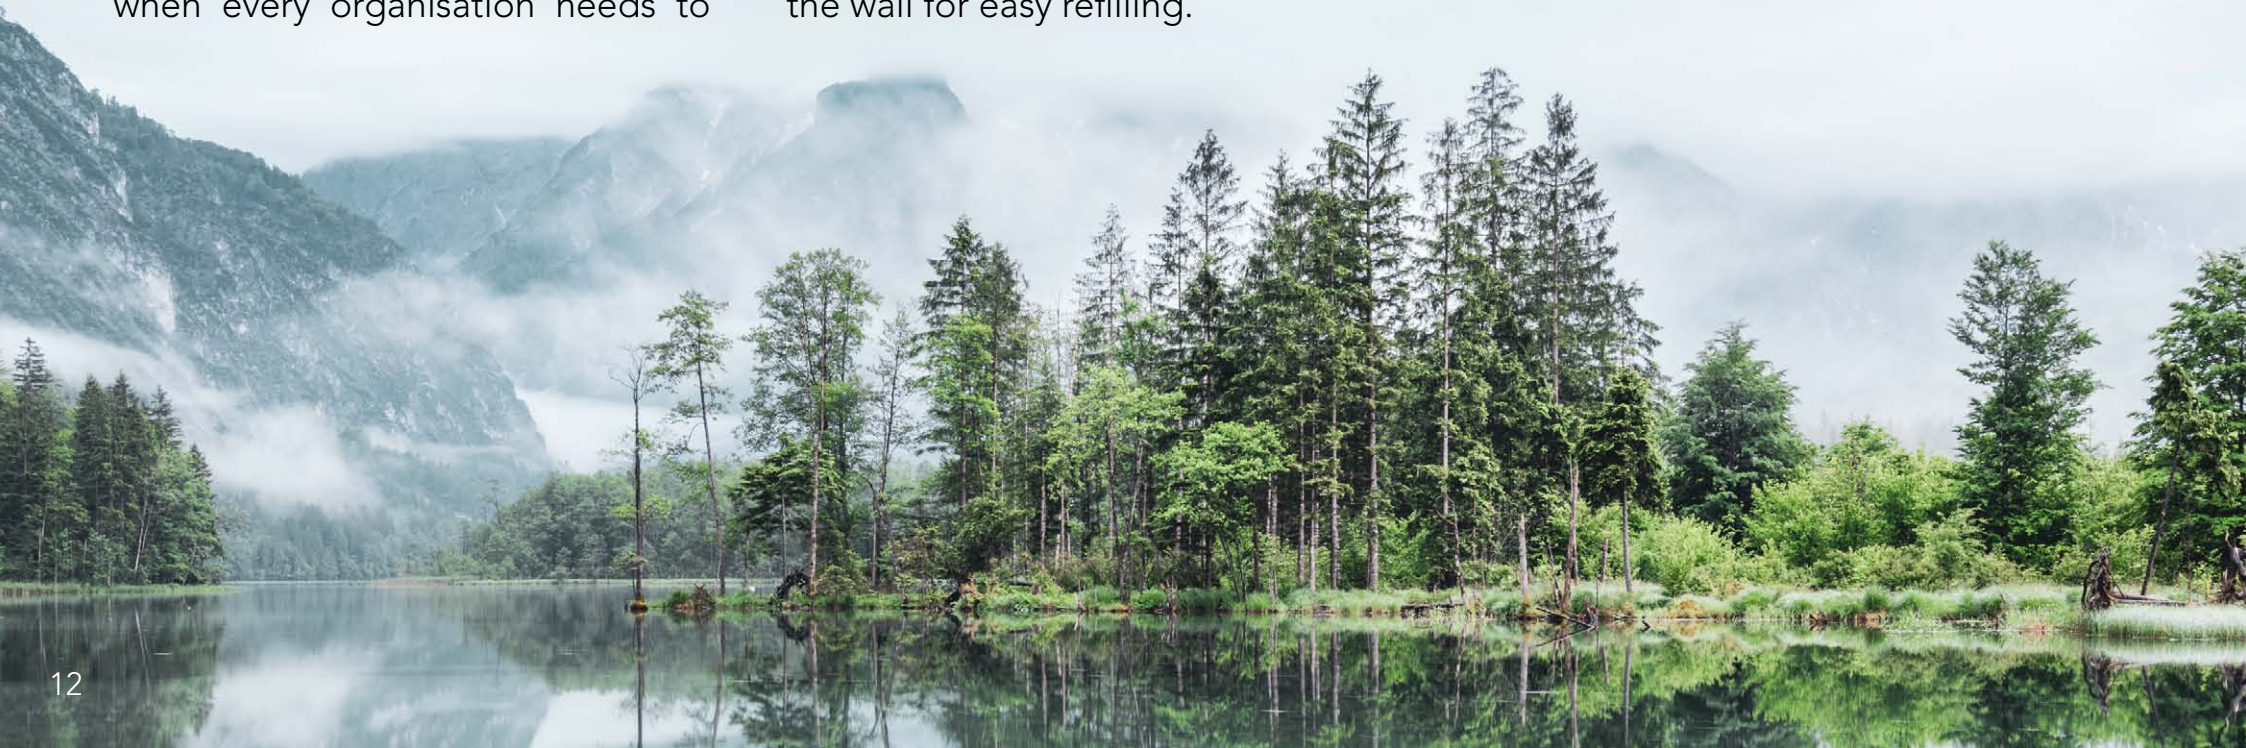

Reducing waste, transport and storage costs helps your business and the environment. In a time when every organisation needs to

demonstrate its ESG (Environmental, Social and Governance) credentials, your guests will appreciate your ethical approach.

Your staff will appreciate the reduced workload, especially where large capacity dispensers are used in high traffic areas. The translucent bottles show at a glance when a top-up is needed and soap chambers lift off the wall for easy refilling.

Install in minutes without tools, using the included waterproof silicone adhesive and 2-way tape. Each unit comes with a choice of labels so that you can let guests know the contents of each chamber.

All our dispensers are waterproof, lockable and made from corrosion-resistant materials – ideal for use in shower cubicles and wetrooms.
